

Engineering Internships In Singapore

The Advanced Digital Sciences Center seeks excellent undergraduate and graduate students in computer engineering, computer science, electrical engineering and closely related fields to join us for internships in Singapore. Internships are available year-round and are designed for students who are considering or pursuing a career in research. ADSC's internships offer the opportunity to contribute to an ongoing cutting-edge research project while building professional connections.

ADSC interns collaborate closely with on-site ADSC research scientists, postdoctoral researchers, graduate students, University of Illinois at Urbana-Champaign faculty, and/or external collaborators. Many of ADSC's interns become coauthors on publications or patent applications from the projects they join. Most ADSC undergraduate interns go on to excellent graduate programs in the U.S. and around the world.

At the undergraduate (one year or less from graduation) and Master's level, ADSC seeks excellent students who are interested in going on to a Ph.D. and are available for 3-6 months. At the Ph.D. level, ADSC seeks students for whom the internship work might form part of their dissertation and who are available for 3-12 months.

Who we are:

The Advanced Digital Sciences Center (ADSC) is a research center in Singapore operated by faculty of the University of Illinois at Urbana-Champaign. Located in the iconic Fusionopolis towers, ADSC focuses on breakthrough innovations that are expected to have a major impact in transforming human beings' utilization of information technology.

ADSC aims to transform the way people and organizations use and interact with information technologies while contributing to the advance of the knowledge-based economy in Singapore and beyond. Research projects at ADSC focus on Interactive Digital Media and the Smart Grid. Projects are initiated and led by University of Illinois faculty.

ADSC was established in 2009, with core funding from Singapore's Agency for Science, Technology and Research (A*STAR).

Application Requirements:

Please visit my.engr.illinois.edu/apply to apply. Applicants will be asked to submit:

- Resume
- One or two recommendation letters
- Transcript from undergraduate and graduate institution(s)
- Short statement summarizing internship and long-term goals
